ROLE **Front End Engineer**

The Special Projects org is looking for highly motivated, quality-centric senior engineers with deep end-to-end web application knowledge to design, develop and research technologies that sets the foundation for a new family of products from the ground up. You will work on both desktop and mobile customer experiences, make the most out of the modern tools like Node.js, React, ES6, and play an integral role in a product that will change the industry, and will be used globally at large scale. Successful candidate must have a strong drive for results, good interpersonal skills, and is a team player who has the ability to work in a fast-paced start-up like environment independently.

Required Skills
